Mark Scheme

2011 examination – June series

Mark schemes are prepared by the Principal Examiner and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation meeting attended by all examiners and is the scheme which was used by them in this examination. The standardisation meeting ensures that the mark scheme covers the candidates' responses to questions and that every examiner understands and applies it in the same correct way. As preparation for the standardisation meeting each examiner analyses a number of candidates' scripts: alternative answers not already covered by the mark scheme are discussed at the meeting and legislated for. If, after this meeting, examiners encounter unusual answers which have not been discussed at the meeting they are required to refer these to the Principal Examiner.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of candidates' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

Further copies of this Mark Scheme are available to download from the AQA Website: www.aqa.org.uk

MARK SCHEME

Information to Examiners

1. General

The mark scheme for each question shows:

- the marks available for each part of the question
- the total marks available for the question
- the typical answer or answers which are expected
- extra information to help the Examiner make his or her judgement and help to delineate what is acceptable or not worthy of credit or, in discursive answers, to give an overview of the area in which a mark or marks may be awarded.

The extra information is aligned to the appropriate answer in the left-hand part of the mark scheme and should only be applied to that item in the mark scheme.

At the beginning of a part of a question a reminder may be given, for example: where consequential marking needs to be considered in a calculation; or the answer may be on the diagram or at a different place on the script.

In general the right hand side of the mark scheme is there to provide those extra details which confuse the main part of the mark scheme yet may be helpful in ensuring that marking is straightforward and consistent.

2. Emboldening

- 2.1 In a list of acceptable answers where more than one mark is available 'any **two** from' is used, with the number of marks emboldened. Each of the following lines is a potential mark.
- 2.2 A bold **and** is used to indicate that both parts of the answer are required to award the mark.
- 2.3 Alternative answers acceptable for a mark are indicated by the use of or. (Different terms in the mark scheme are shown by a /; eg allow smooth / free movement.)

3. Marking points

3.1 Marking of lists

This applies to questions requiring a set number of responses, but for which candidates have provided extra responses. The general principle to be followed in such a situation is that 'right + wrong = wrong'.

Each error/contradiction negates each correct response. So, if the number of error/contradictions equals or exceeds the number of marks available for the question, no marks can be awarded.

However, responses considered to be neutral (indicated as * in example 1) are not penalised.

Example 1: What is the pH of an acidic solution? (1 mark)

Candidate	Response	Marks awarded
1	4.8	0
2	green, 5	0
3	red*, 5	1
4	red*, 8	0

Example 2: Name two planets in the solar system. (2 marks)

Candidate	Response	Marks awarded
1	Pluto, Mars, Moon	1
2	Pluto, Sun, Mars,	0
	Moon	

3.2 Use of chemical symbols / formulae

If a candidate writes a chemical symbol / formula instead of a required chemical name, full credit can be given if the symbol / formula is correct and if, in the context of the question, such action is appropriate.

3.3 Marking procedure for calculations

Full marks can be given for a correct numerical answer, as shown in the column 'answers', without any working shown.

However if the answer is incorrect, mark(s) can be gained by correct substitution / working and this is shown in the 'extra information' column;

3.4 Interpretation of 'it'

Answers using the word 'it' should be given credit only if it is clear that the 'it' refers to the correct subject.

3.5 Errors carried forward

Any error in the answers to a structured question should be penalised once only.

Papers should be constructed in such a way that the number of times errors can be carried forward are kept to a minimum. Allowances for errors carried forward are most likely to be restricted to calculation questions and should be shown by the abbreviation e.c.f. in the marking scheme.

3.6 Phonetic spelling

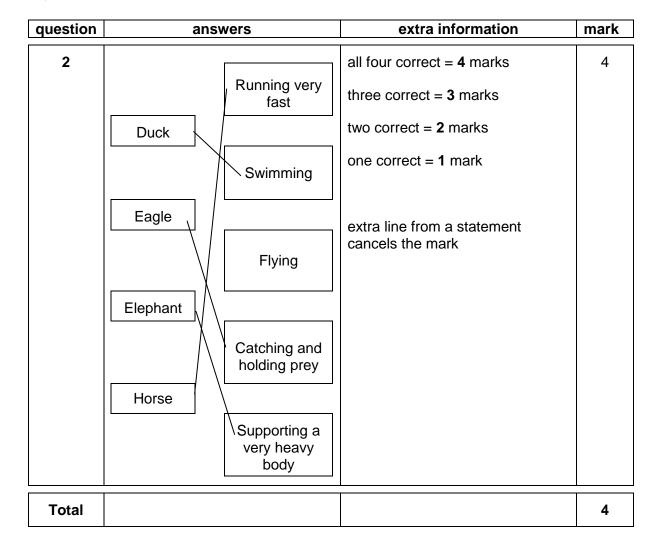

The phonetic spelling of correct scientific terminology should be credited **unless** there is a possible confusion with another technical term.

3.7 Brackets

(....) are used to indicate information which is not essential for the mark to be awarded but is included to help the examiner identify the sense of the answer required.

question	answers	extra information	mark
1(a)(i)	carbon dioxide		1
1(a)(ii)	sulfur dioxide		1
1(b)(i)	reduces land available for animals and plants		1
1(b)(ii)	metals		1
1(c)(i)	pesticide		1
1(c)(ii)	kill other animals		1
Total			6

BLY1F

question	answers	extra information	mark
3(a)	1 egg		1
	2 embryo		1
	3 nucleus		1
	4 skin cell		1
3(b)	the child created by cloning would not have been able to give permission	extra boxes ticked cancels the mark	1
Total			5

BLY1F

question	answers	extra information	mark
4(a)	If milk goes down Prevents the baby choking If the mother touches Helps to protect some of the baby's If the mother strokes Helps the baby to crawl Helps the baby to crawl Helps the baby to crawl	all four correct = 4 marks three correct = 3 marks two correct = 2 marks one correct = 1 mark extra line from a statement cancels the mark	4
4(b)	glands muscles		1
		1 mark for each correct tick	'
		each extra box ticked cancels 1	
		mark	
Total			6

question	answers	extra information	mark
5(a)	a drug taken for pleasure / fun	allow not taken as medicine ignore recreational / legal / harmless / specific effects on body	1
5(b)(i)	45		1
5(b)(ii)	a cup of takeaway coffee		1
5(c)	There is a link between drinking caffeine and hallucinations.	extra boxes ticked cancels the mark	1
Total			4

question	answers	extra information	mark
6(a)	any two from:		2
	• FSH	do not accept FHS	
	• LH	do not accept LSH	
	 oestrogen 		
		allow progesterone as alternative to any hormone	
6(b)	egg(s) / egg cell(s) / ova	do not accept ovaries	1
		do not accept fertilised eggs	
6(c)(i)	any one from:	ignore faster	1
	don't have to take (pill) every day	ignore side effects	
	can't forget to take	ignore cost	
	more reliable		
	lasts 3 years / lasts longer		
	hormone level in blood more constant		
6(c)(ii)	any one from:	ignore cost	1
	eg painful (to insert) / uncomfortable / causes rash	ignore side effects unqualified	
	woman can't take it out		
	more difficult to stop treatment		
	needs to be removed if woman decides to become pregnant	allow have to wait three years to become pregnant	
Total			5

question	answers	extra information	mark
7(a)	warmer / dryer	allow greenhouse effect / global warming ignore wind	1
7(b)(i)	genes / alleles / chromosomes / DNA / genetic material / genetics	allow inheritance allow nutrition / food / metabolism / growth <u>rate</u> ignore environment	1
7(b)(ii)	natural selection / evolution	allow survival of the fittest	1
Total			3

Question 8

question	answers	extra information	mark
8(a)	any two from:		2
	(high) CRP / protein		
	(no) heart condition	allow health	
	(not high) LDL		
	over 50 / age		
	number of tablets (each day)		
		ignore time	
		ignore placebo / rosuvastatin	
		ignore number of people	
8(b)	any one from:		1
	tablet with no drug	allow fake (pill) / dummy (pill) / sugar / chalk (pill)	
	tablet that has no effect	allow drug that has no effect	
	tablet without chemicals	ignore vitamin / mineral pill	
	tablet that people thought contained statin or reference to psychological effect	ignore control / different statin	
8(c)	17802 / large number of people or enough people	ignore control group / fair test / control variables	1
		ignore time / repeats	

Question 8 continues on the next page

Question 8 continued . . .

question	answers	extra information	mark
8(d)	any one from:	ignore cost	1
	placebo group at risk of heart attack or to allow statin to be given to everyone		
	statin group 54% less likely to get heart attack or showed that statin worked or showed trial (very) successful	ignore reliable	
	sufficient information gained / results conclusive	ignore got results early	
	unethical / unfair to carry on trial		
8(e)	to avoid bias or show impartiality	allow manufacturers could cheat	1
	or show results independent	ignore reliability	
		ignore could be sued / blamed if trial went wrong	
		ignore manufacturer would know which group got statin / placebo	
8(f)	any two from:		2
	reduction in <u>LDL</u>	allow improves LDL:HDL balance or LDL and HDL concentrations equal	
		ignore less cholesterol	
		ignore more HDL	
		do not accept less HDL	
	reduction in (saturated) fats		
	reduces deposition of fat / cholesterol / LDL in walls of blood vessels		
	or blood vessels less likely to be blocked with fat / cholesterol / LDL		
Total			8

Question 9

question	answers	extra information	mark
9	(wbc) ingest / digest pathogens / bacteria / viruses	allow eat germs ignore swallow germs ignore ingest the disease	1
		ignore attack / kill the disease	
	(wbc) produce antibodies		1
	(wbc) produce antitoxins		1
	any one from:		1
	(antibodies) destroy or kill pathogens / bacteria / viruses	ignore destroy / kill disease	
	/ germs	ignore attack / fight pathogens	
	(antitoxins) counteract / destroy / neutralise toxins / poisons	ignore attack / killing toxins	
	reasonable reference to memory cells or rapid production of antibodies upon re-infection		
Total			4

The AQA UMS Conversion Calculator is available on the Results statistics page of the AQA Website.
