Mark Scheme

2008 examination – January series

Mark schemes are prepared by the Principal Examiner and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation meeting attended by all examiners and is the scheme which was used by them in this examination. The standardisation meeting ensures that the mark scheme covers the candidates' responses to questions and that every examiner understands and applies it in the same correct way. As preparation for the standardisation meeting each examiner analyses a number of candidates' scripts: alternative answers not already covered by the mark scheme are discussed at the meeting and legislated for. If, after this meeting, examiners encounter unusual answers which have not been discussed at the meeting they are required to refer these to the Principal Examiner.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of candidates' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

Further copies of this Mark Scheme are available to download from the AQA Website: www.aqa.org.uk

However, registered centres for AQA are permitted to copy material from this booklet for their own internal use, with the following important exception: AQA cannot give permission to centres to photocopy any material that is acknowledged to a third party even for internal use within the centre.

Set and published by the Assessment and Qualifications Alliance.

MARK SCHEME

Information to Examiners

1. General

The mark scheme for each question shows:

- the marks available for each part of the question
- the total marks available for the question
- the typical answer or answers which are expected
- extra information to help the Examiner make his or her judgement and help to delineate what is acceptable or not worthy of credit or, in discursive answers, to give an overview of the area in which a mark or marks may be awarded.

The extra information is aligned to the appropriate answer in the left-hand part of the mark scheme and should only be applied to that item in the mark scheme.

At the beginning of a part of a question a reminder may be given, for example: where consequential marking needs to be considered in a calculation; or the answer may be on the diagram or at a different place on the script.

In general the right hand side of the mark scheme is there to provide those extra details which confuse the main part of the mark scheme yet may be helpful in ensuring that marking is straightforward and consistent.

2. Emboldening

- **2.1** In a list of acceptable answers where more than one mark is available 'any **two** from' is used, with the number of marks emboldened. Each of the following lines is a potential mark.
- **2.2** A bold **and** is used to indicate that both parts of the answer are required to award the mark.
- **2.3** Alternative answers acceptable for a mark are indicated by the use of **or**. (Different terms in the mark scheme are shown by a /; eg allow smooth / free movement.)

3. Marking points

3.1 Marking of lists

This applies to questions requiring a set number of responses, but for which candidates have provided extra responses. The general principle to be followed in such a situation is that 'right + wrong = wrong'.

Each error/contradiction negates each correct response. So, if the number of error/contradictions equals or exceeds the number of marks available for the question, no marks can be awarded.

However, responses considered to be neutral (indicated as * in example 1) are not penalised.

Candidate	Response	Marks awarded
1	4,8	0
2	green, 5	0
3	red*, 5	1
4	red*, 8	0

Example 1: What is the pH of an acidic solution? (1 mark)

Example 2: Name two planets in the solar system. (2 marks)

Candidate	Response	Marks awarded
1	Pluto, Mars, Moon	1
2	Pluto, Sun, Mars,	0
	Moon	

3.2 Use of chemical symbols / formulae

If a candidate writes a chemical symbol / formula instead of a required chemical name, full credit can be given if the symbol / formula is correct and if, in the context of the question, such action is appropriate.

3.3 Marking procedure for calculations

Full marks can be given for a correct numerical answer, as shown in the column 'answers', without any working shown.

However if the answer is incorrect, mark(s) can be gained by correct substitution / working and this is shown in the 'extra information' column;

3.4 Interpretation of 'it'

Answers using the word 'it' should be given credit only if it is clear that the 'it' refers to the correct subject.

3.5 Errors carried forward

Any error in the answers to a structured question should be penalised once only.

Papers should be constructed in such a way that the number of times errors can be carried forward are kept to a minimum. Allowances for errors carried forward are most likely to be restricted to calculation questions and should be shown by the abbreviation e.c.f. in the marking scheme.

3.6 Phonetic spelling

The phonetic spelling of correct scientific terminology should be credited **unless** there is a possible confusion with another technical term.

3.7 Brackets

(....) are used to indicate information which is not essential for the mark to be awarded but is included to help the examiner identify the sense of the answer required.

3.8 Unexpected Correct Answers not in the Mark Scheme

The Examiner should use professional judgement to award credit where a candidate has given an unexpected correct answer which is not covered by the mark scheme. The Examiner should consult with the Team Leader to confirm the judgement. The Team Leader should pass this answer on to the Principal Examiner with a view to informing all examiners.

	answers	extra information	mark
(a)	A nucleus		1
	B (cell) membrane		1
	C cytoplasm		1
(b)	any two from:		2
	• (contain) mitochondria		
	• many (mitochondria)		
	• respiration (occurs in mitochondria)		
total			5

	answers	extra information	mark
(a)	4000	award both marks for correct answer, irrespective of working	2
		1500 + 2000 + 500 gains 1 mark	
(b)	day 2 (no mark)		
	any two from:	max 1 mark if correct day not	2
	• more (water in) breath / breathing	identified or if no day given	
	• more (water in) sweat / sweating	accept a lot of sweating	
	• less (water in) urine		
		if no other marks awarded allow 1 mark for more water lost on day 2	
(c)(i)	respiration		1
(c)(ii)	cools / removes heat owtte	ignore 'maintains body temperature' unqualified	1
(c)(iii)	osmosis		1
total			7

	answers	extra information	mark
(a)	characteristics		1
(b)	genes		1
(c)	chromosomes		1
(d)	mitosis		1
(e)	<u>a</u> sexual		1
total			5

Question 4

	answers	extra information	mark
(a)(i)	a conclusion the short bushes grow next to the house a prediction plants will grow faster if they get more light an observation	both correct = 2 marks one correct = 1 mark extra line from a statement cancels the mark	2
(a)(ii)	1 st space: carbon dioxide	allow CO ₂ (ignore superscript) do not allow CO alone	1
	2 nd space: glucose / sugar / starch / carbohydrate		1
(b)(i)	any one from:		1
	• move lamp or change distance between lamp and plant	ignore measure the distance	
	• change wattage / power of (light) bulb	do not accept just "change bulb"	
	• change voltage / power supply to the (light) bulb		
	• change the number of lamps		
	• put translucent material between lamp and plant	accept examples, eg tracing paper / filters	
		do not accept <u>coloured</u> filters	

continued ...

Question 4 continued ...

	answers	extra information	mark
(b)(ii)	rises	ignore numbers	1
	levels off		1
(b)(iii)	idea that it levels off or	answers should relate to photosynthesis and not to bubbling	1
	does not increase at all light intensities		
	or		
	it only increases to a certain amount		
total			8

	answers	extra information	mark
(a)	A carbohydrase		1
	B isomerase		1
(b)	less needed (to get same effect)		1
(c)(i)	they all work at atmospheric pressures	accept any clear indication of correct statement(s) identified	1
	they work well at $25 - 45 ^{\circ}\text{C}$	statement(s) identified	1
(c)(ii)	any two from:	accept any clear indication of correct statement(s) identified	2
	• they are easily broken down by high temperature or the wrong pH	accept for 2 marks if written as two separate disadvantages	
	• they are soluble in water, so it may be difficult to separate them from products		
	• they are expensive to buy		
total			7

	answers	extra information	mark
(a)(i)	a triangular-shaped pyramid, with 4 layers – widest at the bottom	either in blocks or as a triangle	1
	labels in food chain order (from widest part ie plankton—herring— tuna — parasitic / wo	with producer at top gains 2	1
		upside down labelled pyramid with producer at bottom gains 1 mark for labels	
		unlabelled upside down pyramid = 0 marks	
		accept separate boxes	
		correct food chain with correct arrows if given gains 1 mark	
	eg Tuna Herring Plankton	eg Tuna Herring Plankton	
	eg	eg	
	Vorms Tuna Herring Plankton	Plankton Herring V Worms	
	eg Parasites Tuna Herring Plankton	× ^{eg}	
		co	ntinued

Question 6 continued...

	answers	extra information	mark
(a)(ii)	any two from:		2
	• waste / excreted / urine / faeces / CO ₂ (from tuna)	from / of tuna not required but do not accept if of / from other organisms	
	• respiration (of tuna)	ignore used in reproduction	
	• movement (of tuna) / hunting	if a mark is not awarded for respiration / movement / heat allow 1	
	• used for heat (production) (of tuna)	mark for energy (unqualified)	
	• not digested / absorbed		
(b)(i)	40	award both marks for correct answer, irrespective of working	2
		allow (290 – 50)/6 or 240/6 for 1 mark	
		allow 48.3 / 48 $\frac{1}{3}$ / 48 for 1 mark	
(b)(ii)	cost of food / protein		1
(c)	any one from:		1
	• concern about animal welfare or	allow immoral	
	examples or cruel to tuna or unethical or lack of space	ignore not natural	
	• poorer flavour / quality		
total			8

	answers	extra information	mark
(a)(i)	D		1
(a)(ii)	Α		1
(b)(i)	air / oxygen (can enter)	ignore other factors entering or leaving	1
	for (aerobic) respiration	do not accept anaerobic respiration	1
(b)(ii)	(more) minerals / nutrients /salt(s) / ions or		1
	named mineral / element available	ignore fertility / fertiliser	
		allow symbols	
		allow eg mulching / reducing weeds or retain water	
total			5
