Biology Unit Biology B2

Written Paper

Friday 21 May 2010 9.00 am to 9.45 am

You will need no other materials.

You may use a calculator.

Time allowed

45 minutes

Instructions

- Use black ink or black ball-point pen.
- Fill in the boxes at the top of this page.
- Answer all questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- Do all rough work in this book. Cross through any work you do not want to be marked.

Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 45.
- You are expected to use a calculator where appropriate.
- You are reminded of the need for good English and clear presentation in your answers.

Advice

• In all calculations, show clearly how you work out your answer.

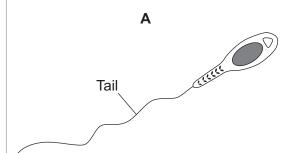

- General Certificate of Secondary Education Foundation Tier June 2010

BLY2F

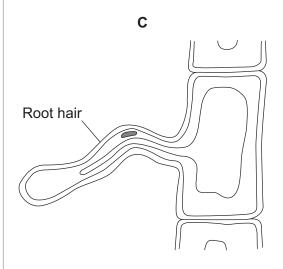

Answer all questions in the spaces provided.

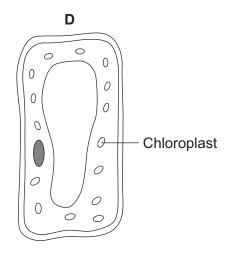

1 The diagrams show four types of cell, **A**, **B**, **C** and **D**. Two of the cells are plant cells and two are animal cells.

В

1 (a) (i) Which two of the cells are plant cells?

Tick (✓) one box.

A and B

A and D

C and D

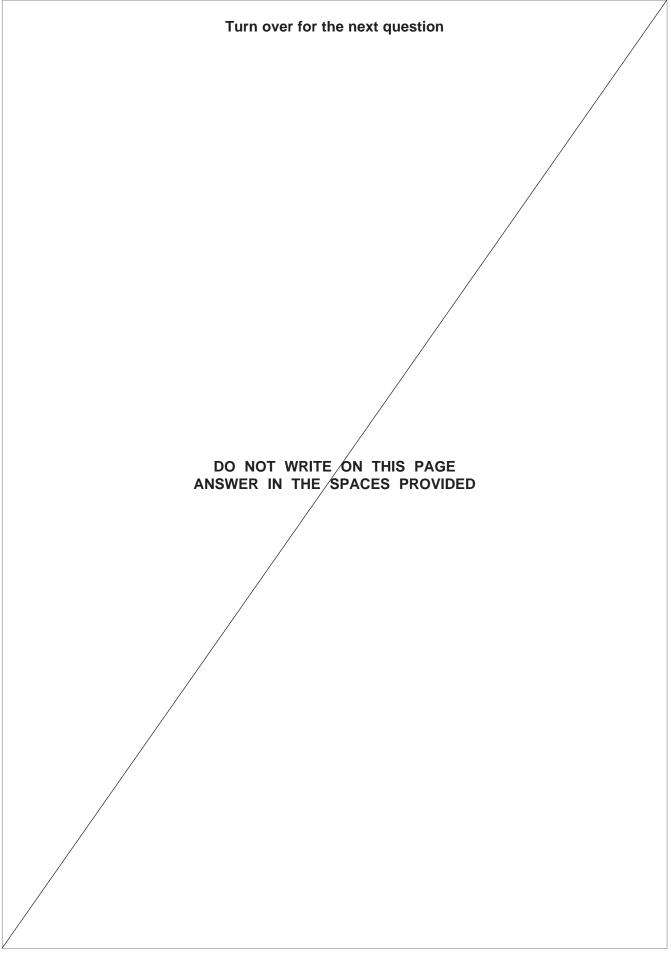

(1 mark)

| 1 (a) (ii) | Which part is found only in p | plant cells? | | |
|------------|---|-----------------------------|-------------|----------|
| | Draw a ring around one ans | wer. | | |
| | cell membrane | cell wall | nucleus | (1 mark) |
| 1 (b) (i) | Which cell, A , B , C or D , is a | adapted for swimming? | | (1 mark) |
| 1 (b) (ii) | Which cell, A , B , C or D , can | n produce glucose by photos | ynthesis? | (1 mark) |
| 1 (c) | Cells A, B, C and D all use | oxygen. | | |
| | For what process do cells us | se oxygen? | | |
| | Draw a ring around one ans | wer. | | |
| | osmosis | photosynthesis | respiration | (1 mark) |
| | Turn o | over for the next question | | |
| | | | | |
| | | | | |

| 2 | This question is about what happens during | g decay. | |
|-------|--|------------------------------|----------|
| | Draw a ring around the correct word to com | plete each sentence. | |
| | | animals. | |
| 2 (a) | After living things die, they are decayed by | microorganisms. | |
| () | | plants. | |
| | | | (1 mark) |
| | | | cold. |
| 2 (b) | Decay happens faster when there is plenty | of oxygen and conditions are | dry. |
| | | | moist. |
| | | | (1 mark) |
| | | osmosis. | |
| 2 (c) | During decay carbon dioxide is produced by | y respiration. | |
| | | photosynthesis. | (1 mark) |
| 2 (d) | Decay releases mineral salts into the soil. | | |
| | | leaves. | |
| | These mineral salts are absorbed by plant | roots. | |
| | | stems. | |
| | | | (1 mark) |
| | | | |
| | | | |
| | | | |
| | | | |
| | | | |

| 3 | The body uses enzymes to molecules. | digest (break down) large food molecules into smaller | |
|-----------|--|---|--|
| 3 (a) (i) | Draw one line from each large food molecule to the enzyme that acts on it. | | |
| | Large food molecule | Enzyme | |
| | | amylase | |
| | starch | | |
| | | protease | |
| | fat | | |
| | | lipase | |
| | protein | | |
| | | isomerase (2 marts) | |
| | | (3 marks) | |
| | | | |
| | | | |
| | | | |

| 3 (a) (ii) Draw a ring around the correct answer to complete each sente | nce. |
|---|------|
|---|------|

Starch is broken down into

amino acids.

fatty acids and glycerol.

sugars.

amino acids.

Fat is broken down into

fatty acids and glycerol.

fructose.

Protein is broken down into

amino acids.

fructose.

sugars.

(3 marks)

3 (b) Bile helps digestion.

Where is bile produced?

Draw a ring around one answer.

liver mouth

(1 mark)

stomach

| 4 | The family tree shows the inheritance of a disorder caused by a dominant allele. | | | | |
|------------|--|--|--|--|--|
| | Fiona and Eric have two children George and Harriet. | | | | |
| | Fiona Eric | | | | |
| | George Harriet | | | | |
| | Key | | | | |
| | Male with disorder Female with disorder | | | | |
| | Male without disorder Female without disorder | | | | |
| | Wide Without disorder | | | | |
| | | | | | |
| 4 (a) | The son, George, has the disorder. | | | | |
| | The daughter, Harriet, does not have the disorder. | | | | |
| 4 (a) (i) | Use the key to draw the symbol for Harriet next to her name on the family tree . (2 marks) | | | | |
| 4 (a) (ii) | The symbol D represents the dominant allele for the disorder. The symbol d represents the recessive allele. | | | | |
| | Fiona has the pair of alleles dd . | | | | |
| | Write the correct pairs of alleles in the boxes. | | | | |
| | Harriet has the pair of alleles . | | | | |
| | A person with the disorder could have | | | | |
| | the pair of alleles or the pair of alleles . (3 marks) | | | | |
| | | | | | |

| 4 (b) | Before Harriet was born, a doctor suggested that Fiona should have the embryo 'screened'. | | |
|------------|---|--|--|
| 4 (b) (i) | Give one reason why the doctor suggested screening. | | |
| | Tick (✓) one box. | | |
| | To check for the D allele | | |
| | To check the sex of the embryo | | |
| | To cure the disorder (1 mark) | | |
| 4 (b) (ii) | Why do some people believe that embryos should not be screened? | | |
| | | | |
| | (1 mark) | | |
| | | | |
| | | | |
| | | | |
| | Turn over for the next question | | |
| | | | |
| | | | |
| | | | |
| | | | |
| | | | |
| | | | |
| | | | |
| | | | |
| | | | |

- Diabetes is a disease in which the concentration of glucose in a person's blood may rise to fatally high levels.
 Insulin controls the concentration of glucose in the blood.
- **5 (a)** Where is insulin produced?

Draw a ring around one answer.

gall bladder liver pancreas

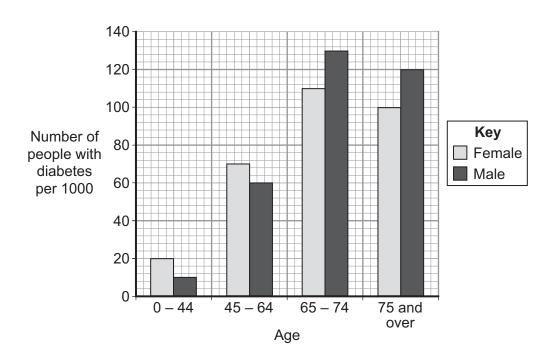

(1 mark)

5 (b) Diabetics may control their blood glucose by injecting insulin.

Apart from using insulin, give **one** other way diabetics may reduce their blood glucose.

(1 mark)

5 (c) The bar chart shows the number of people with diabetes in different age groups in the UK.

7

| escribe how the number of males with diabetes changes between the ages of -44 and 75 and over. |
|--|
| |
| |
| |
| |
| |
| (3 marks) |
| ompare the number of males and females with diabetes: |
| etween the ages of 0 and 64 years |
| |
| |
| ver the age of 65. |
| |
| (2 marks) |
| |

Turn over for the next question

| 6 | This question is about photosynthesis. |
|-----------|--|
| 6 (a) | Plants make glucose during photosynthesis. Some of the glucose is changed into insoluble starch. |
| | What happens to this starch? |
| | Tick (✓) one box. |
| | The starch is converted into oxygen. |
| | The starch is stored for later use. |
| | The starch is used to make the leaf green. (1 mark) |
| 6 (b) | A student investigated the effect of temperature on the rate of photosynthesis in pondweed. |
| | The diagram shows the way the experiment was set up. |
| | Thermometer ——————————————————————————————————— |
| 6 (b) (i) | The student needed to control some variables to make the investigation fair. |
| | State two of these variables. |
| | 1 |
| | 2 |

6 (b) (ii) The bubbles of gas are produced only while photosynthesis is taking place.

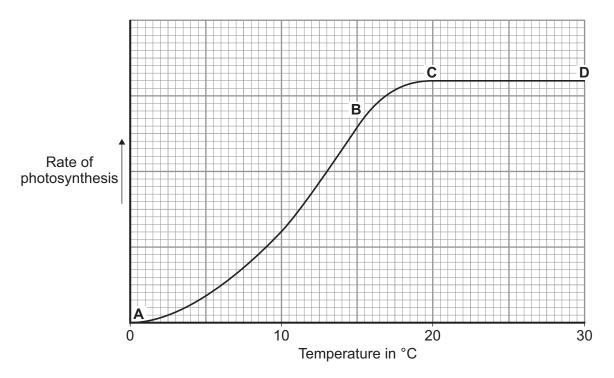

What **two** measurements would the student make to calculate the rate of photosynthesis?

1

2

(2 marks)

6 (c) The graph shows the effect of temperature on the rate of photosynthesis.

6 (c) (i) Name the factor that limits the rate of photosynthesis between the points labelled **A** and **B** on the graph.

| (1) | mark) |
|-----|-------|

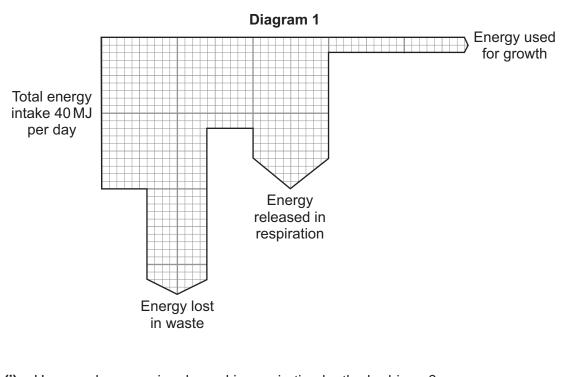

6 (c) (ii) Suggest which factor, carbon dioxide, oxygen or water, might limit the rate of photosynthesis between the points labelled **C** and **D** on the graph.

| | |
|------|----------|
| | (1 mark) |

7

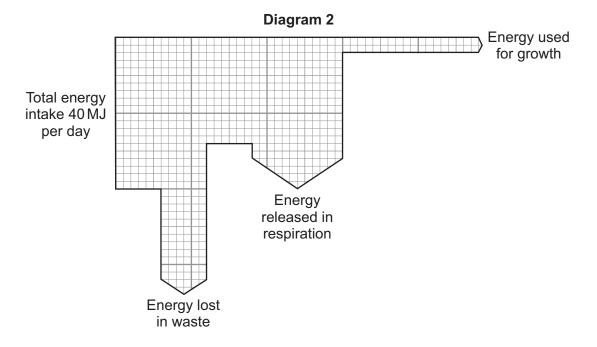

7 (a) Diagram 1 represents what happens to the energy in the food eaten by a herbivore (an animal that eats plants).

| 7 (a) (ı) | How much energy is released in respiration by the herbivore? |
|------------|--|
| | |
| | |
| | Answer MJ per day (1 mark) |
| 7 (a) (ii) | What proportion of the total energy intake of the herbivore is used for growth? |
| | Show clearly how you work out your answer. |
| | |
| | |
| | |
| | Proportion(2 marks) |
| 7 (b) | Give two ways in which the energy, released in respiration, is used by a herbivore. |
| | 1 |
| | 2(2 marks) |
| | (Z marks) |

7 (c) Diagram 2 represents what happens to the energy in the food eaten by a carnivore (an animal that eats other animals).

| (1) | mark) |
|--|-------|
| | |
| Suggest one reason for this. | |
| | |
| The carnivore releases a greater proportion of energy in respiration than the herbiv | ore. |

7 (d) Some farmers keep their animals outdoors. Other farmers keep their animals indoors.

Keeping farm animals indoors increases the proportion of energy in their food that is converted into growth.

Give two reasons why.

| 1 | |
|---|------|
| | |
| | |
| 2 | |
| | /O / |

(2 marks)
